

# "What electricity tariffs for the energy transition?" - April 16, 2025

"What electricity tariffs for the energy transition?" - April 16, 2025 - Fondation universitaire (Brussels) - DemandFlex project

Program:

- 14:00-14:30: **Setting the stage: the electricity bill in Belgium**
- 14:30-15:45: **Panel 1: How to structure retail tariffs to foster demand-side flexibility?**

This panel will explore current developments in retail tariff structures (time-of-use, capacity tariffs, etc.) and the implicit flexibility which they can encourage

Chair: Estelle Cantillon (ULB) | Participants: Elise Viadere (ULB), Mark Vergouwen (UGent), Vincent Debllocq (FEBEG)

- 16:15-17:30: **Panel 2: How to finance the grid that we need for the energy transition?**

This panel will explore the investment needs of system operators to adapt the grid to the changes in electricity consumption and production that the energy transition involves, as well as the financing of such investments through electricity network tariffs.

Chair: Emmanuel Slautsky (ULB) | Participants: Marie Beudels (ULB), Sigrid Jourdain (CREG), François Boisseleau (Synergrid)

- 17:30: **Networking reception**
